# Operations & Training Risk Management Plan

Author: Wahyu A Created: Mar 1
Status: Draft / Final Updated: Mar 31

#### Objective

The objective of this document is to outline risks to the Project Plant Pals to mitigate those risks

## **Executive Summary**

In normal circumstances, we would expect after 6 months project completion, to create a sustainable course recommender system practices for the service's day-to-day operations of the C4U. This includes setting up operational tools, putting sofware in place, and training employees for the new service. See below for risks to this project, and mitigation plan to address them.

#### RISK TYPE ONE: Going over the project budget

| Scenario  | Risk to<br>project<br>(L/M/H) | Mitigation Plan  |
|---|-------------------------------|--|
| The course recommender system added capabilities cost \$10,000 more than initially quoted. 2 added capabilities costs more \$20,000 | High                          | 1. Minimize Risk - Lower truck specifications so it can meet budget and operational requirements.  2. Avoid Risk- Find another vendor that sell trucks with the initial specifications within budget  3. Minimize Risk - Compare no 1 to 2 and research which specifications of trucks are more productive  4. Alternatively, create an analysis Rent vs Buy which is more profitable in the long run.  Transfer Risk - Consider Rental. |
| A product vendor charges a higher rate than expected  | Medium                        | <ol> <li>Minimize Risk - Communicate and negotiate the rate with the vendor and put in a final agreed quotation of both parties including fixed rate for the timeline assurance.</li> <li>Avoid Risk- Find another vendor that offer as rate.</li> <li>Minimize Risk - Have a minimum of 2 vendors, so we have various rate of product</li> </ol>  |

|   |     | materials specially focus on the most purchase material so in the end of the day is equal to the budget.  4. <b>Minimize Risk</b> - Always monitor and review as per weekly for possible of rate fluctuation. |
|---|-----|---|
| A product vendor loses a product shipment | Low | Minimize Risk - Monitor and at least have a minimum of 2 vendors.   |

### RISK TYPE TWO: Falling behind the training schedule

| Scenario  | Risk to<br>project<br>(L/M/H) | Mitigation Plan   |  |
|---|-------------------------------|---|--|
| Training Manager gets sick and misses a week of training  | Low                           | Minimize Risk - Monitor and at least have a replacement / substitute trainer ready  |  |
| Unable to hire enough employees in time to train them before launch                                   | Medium                        | <ol> <li>Minimize Risk - Start Hiring a month early than schedule and hold on meeting on the hiring progress status</li> <li>Minimize Risk - Hiring from non experience to experience</li> <li>Minimize Risk - If in certain milestone, the hiring does not appear to achieve target, consider hiring a part time and internship</li> </ol> |  |
| More than 50% of employees quit after a difficult training process, leaving the company short-staffed | Medium                        | 1. Minimize Risk -Establish a group chat. Hold on daily feedback after training from trainer and the user and review 2. Avoid Risk - Establish a more moderate training process 3. Minimize Risk - Create levels of training based on the experiences as the recruitment may possibly differ in experiences.                                |  |

# Appendix:

#### Probability chart:

| Probability Probability Probability |                                    |  |  |
|-------------------------------------|------------------------------------|--|--|
|                                     | Qualitative                        | Quantitative (if measurable)             |  |
| Low                                 | Very low chance of risk occurring. | Less than <10% chance of risk occurring. |  |
| Medium                              | Medium chance of risk occurring.   | 10%-49% chance of risk occurring.        |  |
| High                                | High chance of risk occurring.     | 50%-100% chance of risk occurring.       |  |

## Impact chart:

| Types of<br>Impact | Low   | Medium  | High   |
|--------------------|---|---|--|
| Financial          | Low financial impact, costing the company \$0-\$14,000                        | Medium financial impact, costing the company \$15,000-\$29,000                          | High financial impact, costing the company \$30,000 or more                |
| Operational        | Low impact to project operations, causing delays of a few days to a few weeks | Medium impact to project operations, with potential to delay project by a month or more | High impact to project operations, with potential to cause project failure |

| Low impact to employee attrition, with 5%+ of |                    | Medium impact to employee attrition, with | High impact to employee attrition, with 50%+ |
|---|--------------------|---|--|
| People  | employees quitting | 25%+ of employees quitting                | employees quitting                           |

### **Probability and Impact Matrix:**

| Inherent Risk |        |        |        |        |
|---------------|--------|--------|--------|--------|
| Impa          |        |        | Impact |        |
|               |        | Low    | Medium | High   |
|               | High   | Medium | High   | High   |
| Probability   | Medium | Low    | Medium | High   |
|               | Low    | Low    | Low    | Medium |
